

Farm2You supplies milk to the Durban Sales office (as well as large amounts to Moya and her boys!) This allows Container World to support this business as a Supplier Development recipient. Farm 2You is run by Khulisani, a farming and agri-processing training centre based in the KZN Midlands and comprises of an agricultural academy and a commercial farm. During the first lock down Khulisani identified a creche that was in dire need of assistance.

A CSI STORY

COLLABORATION GENERATES RESULTS

Through conversation, contacts and collaboration this creche was able to move to a new site (on the local Church grounds), in a new facility (provided by many funders and Container World), connect with electricity (provided by the organisation across the road), and receive educational resources (provided by local farmers). The produce grown by the Khulisani learners at the agri-school will help towards the feeding scheme. In addition, one of the disabled learners, Professor Hlela, has been employed to provide caretaker oversight.

How privileged we are to be included.
